Luminous Derma - Master Project Specification

****Version:**** 1.0

****Status:**** Approved

****Project Owner:**** Salem

****Project Manager:**** ChatGPT

****Project Type:**** Premium Medical Beauty & Skincare E-commerce Platform

****Primary Market:**** Republic of Yemen

Chapter 1 — Executive Summary

1. Project Overview

Luminous Derma is a premium beauty and skincare ecommerce platform designed to provide customers in Yemen with authentic skincare, haircare, beauty, wellness, and medical cosmetic products through a modern, luxurious, and trustworthy shopping experience.

The platform is not intended to be just another online store. It is designed to become a complete beauty ecosystem that combines ecommerce, skincare education, dermatologist guidance, personalized product recommendations, and premium customer service under one unified brand.

The project is being developed using modern web technologies with scalability, performance, accessibility, SEO, and long-term expansion as core architectural principles.

2. Vision

To become the most trusted online destination for skincare, beauty, and wellness products in Yemen, delivering an international shopping experience tailored to the needs of local customers.

3. Mission

Provide carefully selected authentic products, reliable skincare knowledge, and a seamless premium shopping experience that helps customers make informed decisions while building long-term trust in the Luminous Derma brand.

4. Long-Term Goals

Short-Term Goals

- Launch a premium ecommerce platform.
- Build customer trust.
- Achieve product-market fit.
- Establish a recognizable premium brand identity.

Mid-Term Goals

- Become Yemen's leading skincare ecommerce platform.
- Introduce loyalty and rewards programs.
- Launch dermatologist consultation services.
- Expand educational skincare content.

Long-Term Goals

- Expand into GCC countries.

- Launch Android and iOS applications.
- Introduce AI-powered skincare recommendations.
- Support multiple languages and currencies.
- Become a complete beauty ecosystem rather than a traditional online store.

5. Brand Values

- Authenticity
- Trust
- Transparency
- Education
- Premium Customer Experience

Every business decision must reinforce these five values.

6. Brand Positioning

Luminous Derma is NOT:

- A discount store.
- A generic pharmacy.
- A marketplace.

- A copy of another ecommerce website.

Luminous Derma IS:

- A premium skincare destination.
- A trusted beauty advisor.
- A luxury shopping experience.
- An educational beauty platform.
- A modern medical beauty brand.

7. Brand Personality

If Luminous Derma were a person, it would be:

- Professional.
- Elegant.
- Calm.
- Confident.
- Helpful.
- Knowledgeable.
- Honest.
- Never aggressive in selling.

8. Brand Promise

Every product offered by Luminous Derma is carefully selected to provide customers with authentic quality, trusted recommendations, and a premium skincare shopping experience.

9. Official Brand Tagline

Main Tagline

جمالك يبدأ من العناية الصحيحة.

Supporting Statement

منتجات أصلية من أشهر العلامات التجارية العالمية، مختارة بعناية لتناسب احتياجات بشرتك في اليمن.

10. Project Philosophy

The platform must never feel like a traditional ecommerce website.

Instead, customers should feel as though they are entering a premium skincare clinic combined with a luxury beauty boutique.

Every page, feature, interaction, and animation must increase trust, simplify customer decisions, and improve the shopping experience.

11. Success Metrics

The project is considered successful when it achieves:

- Excellent user experience.
- Fast loading pages.
- Strong SEO foundation.
- High customer trust.
- Clear product discovery.
- Simple checkout.
- Smart product recommendations.
- Educational content that improves conversion.
- Scalable architecture for future growth.

12. Non-Negotiable Principles

1. No copied design.
2. Every component must be reusable.
3. Full RTL support across the entire platform.

4. No hardcoded business data.
5. SEO is mandatory.
6. Performance is part of the design.
7. Accessibility must always be respected.
8. Every feature must be scalable.
9. Customer trust always comes before sales.
10. Every decision must support the long-term vision of Luminous Derma as a premium beauty platform.

Chapter 2 — Target Audience & User Personas

1. Target Audience

Luminous Derma is designed for customers who value authentic skincare products, professional recommendations, and a premium shopping experience.

The platform focuses on customers who are willing to pay for quality, trust, and genuine results rather than simply looking for the lowest price.

2. Primary Market

Republic of Yemen

Future Expansion:

- Saudi Arabia

- United Arab Emirates
- Kuwait
- Qatar
- Bahrain
- Oman

3. Target Age Groups

Primary

22 – 40 Years

Secondary

18 – 50 Years

4. Target Gender

Primary Audience

Female

Approximately 80%

Secondary Audience

Male

Approximately 20%

The website should be designed to comfortably serve both genders while maintaining a feminine premium identity.

5. Customer Segments

Segment 1 — University Student

Age

18–24

Needs

- Affordable skincare
- Acne treatment
- Sunscreens

- Daily skincare routine

Buying Behavior

Researches products before purchasing.

Usually influenced by TikTok, Instagram, and dermatologists.

Segment 2 — Working Woman

Age

24–35

Needs

- Premium skincare
- Anti-aging prevention
- Makeup
- Haircare

Buying Behavior

Looks for trusted brands.

Prefers fast delivery.

Values customer service.

Segment 3 — Mother

Age

28–45

Needs

- Baby products
- Family skincare
- Sensitive skin products

Buying Behavior

Highly values authenticity.

Usually purchases repeatedly.

Segment 4 — Beauty Enthusiast

Age

20–35

Needs

- Korean skincare
- Luxury brands
- New arrivals

Buying Behavior

Follows beauty trends.

Frequently tries new products.

Segment 5 — Medical Skincare Customer

Needs

Products recommended by dermatologists.

Examples

- Acne treatment
- Pigmentation
- Rosacea
- Sensitive skin

Buying Behavior

Reads ingredients.

Reads reviews.

Needs educational content before purchasing.

6. Customer Goals

Customers visit Luminous Derma to:

- Buy authentic products.
- Learn about skincare.
- Find products suitable for their skin.
- Build a skincare routine.

- Discover trusted brands.
- Receive reliable recommendations.

7. Customer Pain Points

Current problems faced by customers:

- Counterfeit products.
- Poor product descriptions.
- Difficult product comparison.
- Too many confusing options.
- Lack of trustworthy recommendations.
- Poor customer support.
- Slow delivery updates.

Luminous Derma must solve each of these problems.

8. Customer Expectations

Customers expect:

- Original products.

- Fast website.
- Clear product information.
- Honest recommendations.
- Secure payment.
- Fast checkout.
- Professional customer support.
- Beautiful interface.
- Easy navigation.

9. Customer Journey

Stage 1

Customer discovers the website.

Stage 2

Browses categories or searches for a product.

Stage 3

Reads product information.

Stage 4

Compares products.

Stage 5

Adds product to cart.

Stage 6

Completes checkout.

Stage 7

Receives delivery updates.

Stage 8

Receives follow-up recommendations.

Stage 9

Returns for another purchase.

10. Customer Retention Strategy

The platform should encourage customers to return through:

- Personalized recommendations.
- Loyalty points.
- Educational articles.
- New arrivals.
- Wishlist reminders.
- Product refill reminders.
- Birthday offers.

- Exclusive promotions.
- Routine Builder updates.

11. User Experience Principles

Every customer interaction should feel:

- Simple
- Fast
- Premium
- Trustworthy
- Helpful
- Educational

Customers should never feel lost or overwhelmed.

Every screen should guide them naturally toward the next action.

12. Design Decisions Based on Audience

Because most customers are female and shopping from mobile devices:

- Mobile-first design is mandatory.
- Large touch targets.
- Clear typography.
- Soft premium colors.
- Simple navigation.
- Minimal cognitive load.
- Fast page transitions.
- Easy checkout process.

Every future feature must improve customer confidence before increasing sales.

Chapter 3 — Design System

1. Design Philosophy

The visual identity of Luminous Derma must communicate:

- Luxury
- Trust
- Simplicity
- Professionalism
- Calmness
- Elegance

The interface should feel like entering a premium dermatology clinic combined with a luxury beauty boutique.

Every visual decision should reinforce confidence before encouraging purchases.

2. Design Principles

The entire platform must follow these principles:

1. Minimalism over complexity.
2. White space is part of the design.
3. Fewer colors, stronger identity.
4. Consistency is more important than creativity.
5. Components are reused everywhere.
6. Typography guides the eye.
7. Motion supports usability.
8. Every element must have a purpose.

Chapter 4 — Homepage Blueprint

1. Homepage Objective

The homepage is the most important page in the entire platform.

Its mission is not only to display products.

Its mission is to:

- Build trust.
- Introduce the brand.
- Help customers discover products.
- Guide customers naturally toward purchase.
- Educate customers.
- Increase conversion rate.

Every section on the homepage must have a clear business purpose.

2. Homepage Structure

The homepage will be built in the following order:

1. Top Bar
2. Header
3. Navigation
4. Hero Banner

5. Categories
6. Best Sellers
7. New Arrivals
8. Special Offers
9. Featured Products
10. Shop by Brand
11. Why Choose Luminous Derma
12. Dermatologist Recommendations
13. Customer Testimonials
14. Beauty Articles
15. Instagram Gallery (Future)
16. Newsletter
17. Footer

3. Hero Section

Purpose

Capture attention within the first three seconds.

Requirements

- Premium visual.
- Large promotional banner.

- Clear headline.
- Clear CTA.
- Rotating slides.
- Smooth animation.
- Mobile optimized.

Primary CTA

تسوقي الآن

Secondary CTA

استكشف المنتجات

4. Categories Section

Purpose

Help customers quickly reach the desired product category.

Categories

- Skincare
- Haircare

- Body Care
- Makeup
- Perfume
- Baby Care
- Beauty Tools
- Supplements

Each category includes

- Icon
- Name
- Hover Animation

5. Best Sellers

Purpose

Display products with the highest sales.

Each card includes

- Product Image
- Brand
- Name

- Rating
- Reviews Count
- Price
- Old Price
- Discount Badge
- Wishlist
- Add to Cart

6. New Arrivals

Purpose

Show recently added products.

Badge

جديد

7. Special Offers

Purpose

Increase conversion.

Products should include

Discount Percentage

Limited Offer Badge

Countdown Support (Future)

8. Featured Products

Purpose

Highlight strategic products selected by administrators.

These products are manually controlled from the Admin Dashboard.

9. Shop by Brand

Purpose

Increase customer confidence.

Display international brands such as:

- CeraVe
- La Roche-Posay
- Vichy
- Bioderma
- COSRX
- The Ordinary
- Anua
- Eucerin

Each logo links to its dedicated brand page.

10. Why Choose Luminous Derma

Purpose

Build trust.

Cards

- 100% Authentic Products

- Fast Delivery
- Secure Payment
- Expert Support

11. Dermatologist Recommendations

Purpose

Increase credibility.

Display selected products recommended by skincare experts.

Future Enhancement

Verified Dermatologist Profiles.

12. Customer Testimonials

Purpose

Increase social proof.

Each testimonial includes

- Customer Name
- Rating
- Review
- Optional Photo

13. Beauty Articles

Purpose

Educate customers.

Each article contains

- Cover Image
- Title
- Category
- Reading Time
- Publish Date

14. Newsletter

Purpose

Collect customer emails.

Offer

Exclusive offers

Beauty tips

New arrivals

15. Footer

Contains

- Company Information
- Quick Links
- Categories
- Brands
- Customer Service
- Social Media
- Contact Information

- Payment Methods
- Copyright

16. Homepage UX Rules

The homepage must never feel crowded.

No section should compete with the previous one.

Every section should naturally lead to the next.

Scrolling should feel smooth and premium.

Animations should support usability rather than distract from it.

17. Homepage Success Criteria

A successful homepage should allow users to:

- Understand the brand within 5 seconds.
- Find products within 10 seconds.
- Reach checkout with minimal effort.

- Discover educational content naturally.
- Feel confident purchasing from Luminous Derma.

The homepage is considered the digital storefront of the brand and must always reflect its premium identity.

Chapter 5 — Product Catalog & Shopping Experience

1. Product Catalog Objective

The product catalog is the core shopping area of Luminous Derma.

Its purpose is to help customers discover the right products quickly through:

- Clear organization.
- Smart filtering.
- Professional product information.
- Personalized recommendations.
- Easy comparison.

The catalog must feel like a premium beauty consultant, not a simple product list.

2. Product Categories Structure

Main Categories:

Skincare

Subcategories:

- Cleansers
- Moisturizers
- Serums
- Sunscreen
- Eye Care
- Masks
- Acne Care
- Anti-Aging
- Pigmentation Care
- Sensitive Skin

Haircare

Subcategories:

- Shampoo
- Conditioner
- Hair Treatments
- Hair Oils

- Hair Masks
- Hair Supplements

Body Care

Subcategories:

- Body Lotion
- Body Wash
- Scrubs
- Hand Care
- Foot Care

Makeup

Subcategories:

- Foundation
- Lip Products
- Eye Makeup
- Blush
- Tools

Fragrance

Subcategories:

- Perfumes
- Body Mist
- Gift Sets

Baby Care

Subcategories:

- Baby Skin Care
- Baby Bath
- Baby Protection

3. Product Listing Page

Every category page must contain:

Header Area

Includes:

- Category Name
- Category Description
- Product Count
- Breadcrumb Navigation

Filtering System

Filters:

Brand

Example:

- CeraVe
- Vichy
- Bioderma
- COSRX

Price Range

Slider based.

Skin Type

Options:

- Dry Skin
- Oily Skin
- Combination Skin
- Sensitive Skin
- Normal Skin

Skin Concern

Options:

- Acne
- Wrinkles
- Dark Spots

- Hydration

- Redness

Product Type

Example:

Serum

Cream

Cleanser

Sunscreen

Rating

Filter by stars.

Sorting

Options:

- Most Popular
- Newest
- Price Low to High
- Price High to Low
- Highest Rated

4. Product Grid

Desktop:

4 products per row.

Tablet:

3 products per row.

Mobile:

2 products per row.

5. Product Card Standard

Every product card must include:

Product Image

Requirements:

- High quality.
- Rounded corners.
- Optimized.
- Hover zoom.

Product Information

Contains:

- Brand Name.
- Product Name.
- Short Description.
- Rating.
- Reviews Count.
- Current Price.

- Old Price.
- Discount Percentage.

Actions

Buttons:

- Add to Cart.
- Wishlist.
- Quick View.

6. Quick View Feature

Purpose:

Allow customers to check products without leaving the page.

Quick View includes:

- Product Image.
- Name.
- Price.

- Rating.
- Short Description.
- Add to Cart.

7. Product Search

Search must support:

- Product Name.
- Brand.
- Category.
- Ingredients.
- Skin Concern.

8. Smart Search Suggestions

While typing:

Show:

- Matching products.
- Popular searches.

- Categories.

- Brands.

Example:

User types:

"serum"

System shows:

- Vitamin C Serum

- Hyaluronic Acid Serum

- The Ordinary Serums

9. Empty Search Experience

If no products found:

Do not show a dead page.

Show:

- Suggested products.

- Popular categories.
- Search tips.

10. Personalized Recommendations

Future system:

Based on:

- Skin type.
- Previous purchases.
- Browsing history.
- Wishlist.
- Quiz results.

Examples:

"Products suitable for your dry skin"

"Complete your skincare routine"

11. Product Comparison Feature

Customers can compare:

- Price.
- Ingredients.
- Benefits.
- Skin Type.
- Product Size.
- Ratings.

Comparison should be simple and visual.

12. Frequently Bought Together

Increase order value.

Example:

Cleanser + Serum + Moisturizer

Displayed as:

"Complete your routine"

13. Recently Viewed Products

The system remembers viewed products and displays them later.

Purpose:

Improve conversion.

14. Product Trust Elements

Every product page and card should communicate:

- Authentic Product.
- Original Brand.
- Secure Purchase.
- Customer Support.

15. Catalog Performance Rules

The catalog must support:

- Pagination or infinite scrolling.
- Fast image loading.
- Server-side rendering.
- SEO friendly URLs.
- Cached product data.

16. SEO Requirements

Each category must have:

- Unique title.
- Meta description.
- Structured data.
- Breadcrumb schema.
- Optimized content.

17. Admin Control

Administrators can:

- Add products.

- Edit products.
- Create categories.
- Manage brands.
- Create discounts.
- Feature products.
- Control product visibility.

18. Catalog Success Criteria

A customer should be able to:

- Find a product quickly.
- Understand why it fits their needs.
- Trust the product information.
- Add it to cart easily.

The catalog must behave like a professional beauty advisor, not just a product database.

Chapter 6 — Product Detail Page (PDP)

1. Product Page Objective

The Product Detail Page is the most important conversion page after the homepage.

Its purpose is to transform customer interest into purchase confidence.

The page must answer:

- What is this product?
- Who is it for?
- Why should I use it?
- How do I use it?
- Is it authentic?
- Is it suitable for my skin?
- Should I buy it?

The customer should feel guided by a skincare expert.

2. Product Page Structure

The page contains:

1. Breadcrumb Navigation
2. Product Gallery
3. Product Information
4. Purchase Section
5. Product Benefits
6. Ingredients
7. How To Use

- 8. Skin Compatibility
- 9. Reviews
- 10. Questions & Answers
- 11. Related Products
- 12. Complete Your Routine
- 13. Recently Viewed Products

3. Breadcrumb Navigation

Example:

Home

Skincare

Serums

Vitamin C Serum

Purpose:

- Improve navigation.
- Improve SEO.
- Help customers understand location.

4. Product Gallery

Requirements:

- Large main image.
- Multiple thumbnails.
- Zoom functionality.
- Product images.
- Packaging images.
- Texture images when available.

Supported media:

- Images.
- Videos (Future).

Images must be:

- High quality.
- Optimized.
- Responsive.

5. Product Information Section

Contains:

Brand

Example:

CeraVe

The brand name links to the brand page.

Product Name

Clear and readable.

Rating

Includes:

- Average rating.
- Number of reviews.
- Link to reviews section.

Example:

★★★★★

4.8 (245 Reviews)

Product Description

Short professional description.

Must explain:

- Main benefit.
- Target customer.
- Key advantage.

6. Price Section

Contains:

- Current price.
- Previous price.
- Discount percentage.
- Currency.

Currency:

YER

Example:

12,500 ر.ي

7. Purchase Area

Contains:

Quantity Selector

+

-

Add To Cart Button

Primary CTA.

Arabic:

أضيفي إلى السلة

Buy Now Button

Future feature.

Allows direct checkout.

Wishlist Button

Save product for later.

8. Trust Information

Displayed near purchase button.

Includes:

- Original Product Guarantee.
- Secure Payment.
- Delivery Across Yemen.
- Customer Support.

Purpose:

Reduce purchase hesitation.

9. Product Benefits

Section title:

لماذا تختارين هذا المنتج؟

Contains:

- Main benefits.
- Results.
- Usage advantages.

Example:

- Deep hydration.
- Supports skin barrier.
- Suitable for sensitive skin.

10. Ingredients Section

Purpose:

Increase transparency.

Contains:

- Main ingredients.

- Ingredient explanation.
- Ingredient benefits.

Example:

Hyaluronic Acid

Benefit:

Hydration.

11. How To Use

Clear step-by-step instructions.

Example:

1. Cleanse your face.
2. Apply serum.
3. Follow with moisturizer.

12. Skin Compatibility

Shows:

Suitable For:

- Dry Skin.
- Oily Skin.
- Combination Skin.
- Sensitive Skin.

Skin Concerns:

- Acne.
- Dryness.
- Pigmentation.
- Aging.

13. Beauty Routine Integration

Feature:

"Complete Your Routine"

Example:

Morning Routine:

1. Cleanser
2. Serum
3. Moisturizer
4. Sunscreen

Purpose:

Increase average order value.

14. Frequently Bought Together

Suggest complementary products.

Example:

Customer buying:

Cleanser

Suggested:

+ Moisturizer

+ Sunscreen

15. Reviews System

Reviews include:

- Customer name.
- Rating.
- Comment.
- Date.
- Verified Purchase Badge.

Review Filters

Users can filter:

- Highest Rating.
- Lowest Rating.
- With Images.

16. Questions & Answers

Customers can ask questions.

Examples:

"Is this suitable for sensitive skin?"

Answers can come from:

- Admin.
- Experts.
- Community.

17. Related Products

Recommendation logic:

Based on:

- Same category.
- Same concern.

- Same routine.
- Similar customers.

18. Recently Viewed Products

Show products previously viewed by the customer.

Purpose:

Improve return visits.

19. Product Page SEO

Every product page must include:

- Unique Title.
- Meta Description.
- Product Schema.
- Review Schema.
- Breadcrumb Schema.
- Optimized URL.

Example:

luminousderma.com/products/vitamin-c-serum

20. Product Page Performance

Requirements:

- Fast image loading.
- Server-side rendering.
- Cached data.
- Optimized components.
- Mobile-first design.

21. Admin Product Management

Admin can manage:

- Product name.
- Brand.
- Images.
- Price.

- Discount.
- Inventory.
- Ingredients.
- Benefits.
- Categories.
- SEO information.

22. Product Page Success Criteria

A successful product page must:

- Build trust.
- Explain value.
- Remove doubts.
- Encourage purchase.
- Increase customer satisfaction.

The product page should feel like a professional skincare consultation, not only a sales page.

Chapter 7 — Cart, Checkout & Order Management System

1. Ecommerce Flow Objective

The checkout experience is one of the most important parts of Luminous Derma.

Its goal is to make purchasing:

- Simple.
- Fast.
- Secure.
- Trustworthy.
- Suitable for the Yemen market.

The customer should complete an order with minimum effort and maximum confidence.

2. Shopping Cart System

Cart Purpose

The cart allows customers to review selected products before checkout.

3. Cart Features

The cart must include:

Product Information

Each item displays:

- Product Image.
- Brand Name.
- Product Name.
- Quantity.
- Price.
- Discount.
- Total Item Price.

Quantity Management

Customers can:

- Increase quantity.
- Decrease quantity.
- Remove product.

Changes should update instantly.

Save For Later

Customers can move products from cart to wishlist.

Cart Summary

Contains:

- Subtotal.
- Discount.
- Delivery Cost.
- Final Total.

Promotional Code

Support:

- Discount codes.
- Campaign codes.
- Seasonal offers.

Example:

RAMADAN20

4. Cart Recommendations

Before checkout, show:

"Complete Your Routine"

Examples:

If customer buys:

Serum

Suggest:

- Moisturizer.

- Sunscreen.

- Cleanser.

Purpose:

Increase customer value without being aggressive.

5. Empty Cart Experience

Never show an empty dead page.

Display:

- Friendly message.
- Popular products.
- Best sellers.
- Categories.

Example:

"ابدئي رحلة العناية ببشرتك"

6. Checkout System

Checkout Philosophy

Checkout should be:

- Short.
- Clear.

- Distraction-free.

Avoid unnecessary fields.

7. Checkout Steps

Step 1 — Customer Information

Required:

- Full Name.
- Phone Number.
- Email (optional).
- Customer Notes.

Step 2 — Delivery Information

Required:

- City.
- Area.
- Address.

- Delivery Notes.

Designed specifically for Yemen.

Step 3 — Shipping Method

Options:

Future expandable.

Examples:

- Standard Delivery.

- Express Delivery.

Step 4 — Payment Method

Version 1:

Cash On Delivery

Future:

- Credit Cards.
- Visa.
- Mastercard.
- Apple Pay.
- Google Pay.
- Local payment providers.

Step 5 — Order Review

Customer reviews:

- Products.
- Address.
- Payment method.
- Final amount.

Then confirms order.

8. Order Confirmation

After successful checkout:

Display:

- Order Number.
- Order Summary.
- Delivery Information.
- Estimated Delivery Time.

Send confirmation through:

- Website.
- Email (Future).
- WhatsApp (Recommended).

9. Order Tracking System

Customers can track:

Order Status:

Pending

Order received.

Confirmed

Order accepted.

Preparing

Products being prepared.

Shipped

Order delivered to courier.

Delivered

Customer received order.

Cancelled

Order cancelled.

10. Customer Account Orders

Users can view:

- Current Orders.
- Previous Orders.
- Order Details.
- Reorder Previous Products.

11. Reorder Feature

Allow customers to repeat previous purchases quickly.

Example:

"إعادة طلب آخر روتين"

Useful for:

- Skincare products.
- Supplements.
- Haircare.

12. Customer Notifications

Future system:

Notifications for:

- Order confirmation.
- Shipping updates.
- Delivery updates.
- Promotions.
- Restock alerts.

13. Delivery Strategy

The platform must support:

All Yemen governorates.

Delivery information should be clear.

Customers must know:

- Delivery cost.
- Expected time.
- Available areas.

14. Checkout UX Rules

Must follow:

- Maximum simplicity.
- Large buttons.
- Clear steps.
- Mobile optimization.
- No unnecessary distractions.

15. Checkout Trust Elements

Display:

- Secure Checkout.
- Original Products Guarantee.
- Customer Support.
- Easy Returns Policy.

16. Order Management (Admin)

Admin can:

- View orders.
- Update status.
- Print invoices.
- Contact customers.
- Manage cancellations.
- Track delivery.

17. Invoice System

Invoices include:

- Brand Logo.
- Order Number.
- Customer Information.
- Products.
- Prices.
- Delivery Information.
- Payment Method.

18. Return & Refund System

Future support:

- Return requests.
- Refund tracking.
- Customer communication.

19. Checkout Performance Requirements

Checkout must:

- Load quickly.
- Save cart state.
- Handle connection interruptions.
- Prevent duplicate orders.
- Validate all information.

20. Checkout Success Criteria

A successful checkout system should:

- Convert visitors into buyers.
- Reduce abandoned carts.
- Build trust.
- Work perfectly on mobile.
- Support future payment expansion.

The checkout experience should feel as premium and reliable as the world's leading beauty ecommerce platforms.

Chapter 8 — User Account, Wishlist, Loyalty & Personalization System

1. User Account Objective

The customer account system transforms Luminous Derma from a simple ecommerce store into a personalized beauty platform.

The goal is to create a long-term relationship with customers by remembering preferences, purchases, routines, and skincare needs.

2. Account Registration

Users can create an account using:

- Phone Number
- Email Address
- Password
- Social Login (Future)

3. Account Benefits

Registered customers receive:

- Faster checkout.
- Order history.
- Wishlist.
- Saved addresses.
- Personalized recommendations.

- Loyalty points.
- Exclusive offers.
- Skincare routine management.

4. User Dashboard

The dashboard contains:

Profile

Includes:

- Name.
- Phone.
- Email.
- Profile Image (Future).
- Preferences.

My Orders

Customers can view:

- Current orders.
- Previous orders.
- Order status.
- Order details.
- Reorder option.

Saved Addresses

Users can save:

- Home address.
- Work address.
- Multiple delivery locations.

Wishlist

Users can save products for later.

Features:

- Add product.
- Remove product.

- Move to cart.
- Receive price alerts (Future).

5. Wishlist Strategy

Purpose:

Increase conversion by allowing customers to save products they are interested in.

The system can later notify customers about:

- Price drops.
- Restocks.
- Special offers.

6. Skin Profile System

A key differentiating feature of Luminous Derma.

Customers can create their skincare profile.

Information:

Skin Type

Options:

- Dry
- Oily
- Combination
- Sensitive
- Normal

Skin Concerns

Options:

- Acne
- Dark Spots
- Wrinkles
- Dehydration
- Redness
- Large Pores
- Uneven Texture

Lifestyle Information

Optional:

- Age.
- Climate.
- Daily habits.
- Sun exposure.

7. Beauty Quiz

Purpose

Help customers discover suitable products.

The quiz asks:

- What is your skin type?
- What are your main concerns?
- What products do you currently use?
- What results do you want?

Quiz Results

The system provides:

- Recommended products.
- Suggested routine.
- Educational tips.

8. Routine Builder

One of the main premium features.

Customers can create:

Morning Routine

Example:

1. Cleanser
2. Serum
3. Moisturizer
4. Sunscreen

Evening Routine

Example:

1. Cleanser
2. Treatment
3. Eye Cream
4. Night Moisturizer

9. Smart Routine Recommendations

Based on:

- Skin profile.
- Quiz results.
- Previous purchases.
- Browsing behavior.

The system suggests:

"Add this product to complete your routine."

10. Loyalty Program

Objective

Increase customer retention and repeat purchases.

11. Points System

Customers earn points through:

- Purchases.
- Reviews.
- Account creation.
- Referrals.
- Social engagement (Future).

12. Rewards

Points can be exchanged for:

- Discounts.
- Free products.
- Exclusive offers.
- Early access.

13. Membership Levels

Future feature.

Example:

Silver

Basic rewards.

Gold

More benefits.

Platinum

VIP experience.

14. Referral Program

Customers invite friends.

Benefits:

Customer receives:

- Points.
- Discount.

New customer receives:

- Welcome offer.

15. Refill Reminder System

Important for skincare products.

Example:

Customer bought:

Vitamin C Serum

After estimated usage period:

Send reminder:

"هل انتهى سيرومك؟ يمكنك إعادة الطلب الآن"

16. Personalized Homepage

Future enhancement.

Homepage changes based on customer.

Examples:

"منتجات مناسبة لبشرتك"

"أكمل روتينك"

"منتجات شاهدها سابقاً"

17. Recently Viewed Products

System remembers:

- Products viewed.
- Categories visited.
- Brands interested in.

Used for recommendations.

18. Customer Communication

Future notifications:

- New arrivals.
- Restocked products.
- Exclusive offers.
- Birthday offers.
- Routine reminders.

Channels:

- Website Notifications.
- Email.
- WhatsApp.

19. Privacy Rules

Customer data must be:

- Secure.
- Protected.
- Used only to improve experience.

Customers must control:

- Notifications.
- Profile information.
- Data preferences.

20. Personalization Success Criteria

A successful personalization system should make customers feel:

"The website understands my skincare needs."

The goal is not only selling products.

The goal is building a trusted skincare relationship with every customer.

Chapter 9 — Brands, Experts, Articles & Content Strategy

1. Content Strategy Objective

Luminous Derma is not only an ecommerce platform.

It is a trusted beauty education platform.

The content strategy exists to:

- Build authority.
- Increase customer trust.
- Educate users.
- Improve SEO.
- Help customers choose the right products.
- Increase organic traffic.

2. Brand Pages System

Purpose

Create dedicated pages for every major skincare and beauty brand.

A brand page should feel like an official brand destination inside Luminous Derma.

3. Brand Page Structure

Each brand page includes:

Brand Header

Contains:

- Brand Logo.
- Brand Name.
- Brand Description.
- Country of Origin.
- Brand Story.

Brand Products

Display:

- All available products.
- Best sellers.
- New arrivals.
- Featured products.

Brand Categories

Example:

CeraVe:

- Cleansers.
- Moisturizers.
- Serums.
- Sunscreens.

Brand Education

Contains:

- Brand philosophy.
- Main technologies.
- Popular ingredients.
- Customer favorites.

4. Supported Brands Examples

Initial brands may include:

- CeraVe
- La Roche-Posay
- Vichy
- Bioderma
- COSRX
- The Ordinary
- Anua
- Eucerin
- Estée Lauder
- Avène

The system must support adding unlimited future brands.

5. Expert / Dermatologist Section

Purpose

Increase medical credibility.

Customers should feel that Luminous Derma is guided by professionals.

6. Expert Profile

Each expert profile contains:

- Profile Image.
- Name.
- Specialty.
- Biography.
- Credentials.
- Social Links.
- Recommended Products.
- Articles.

7. Expert Features

Future features:

- Online consultation booking.
- Questions submission.
- Expert answers.
- Live sessions.

8. Recommended Products By Experts

Experts can recommend:

- Skincare products.
- Routines.
- Ingredients.

Example:

"Recommended for sensitive skin"

9. Articles & Beauty Blog

Purpose

Create educational content and improve SEO.

10. Article Categories

Examples:

Skincare

- Acne.
- Hydration.
- Anti-aging.
- Sensitive skin.

Ingredients

Examples:

- Retinol.

- Hyaluronic Acid.
- Vitamin C.
- Niacinamide.

Beauty Tips

Examples:

- Daily routines.
- Seasonal skincare.
- Common mistakes.

Product Guides

Examples:

- Best sunscreen.
- Best moisturizer.
- Serum comparison.

11. Article Page Structure

Contains:

- Cover Image.
- Title.
- Author.
- Publish Date.
- Reading Time.
- Content.
- Related Products.
- Related Articles.

12. SEO Content Strategy

Every article should target:

- Customer questions.
- Search keywords.
- Product-related problems.

Examples:

"What is the best moisturizer for dry skin?"

"How to use Vitamin C serum?"

13. Product Content Connection

Articles should connect naturally with products.

Example:

Article:

"How to build a morning skincare routine"

Recommended products:

- Cleanser.
- Serum.
- Moisturizer.
- Sunscreen.

14. Social Media Integration

Future support:

Instagram Gallery.

TikTok Content.

Beauty Tutorials.

Customer Content.

15. User Generated Content

Future feature.

Customers can share:

- Reviews with images.
- Skincare journeys.
- Before/After results.

16. Content Management System

Admin can manage:

- Articles.
- Authors.
- Categories.
- Brands.
- Expert profiles.
- Featured content.

17. Content Quality Rules

All content must be:

- Accurate.
- Professional.
- Easy to understand.
- Helpful.
- SEO optimized.

Avoid:

- Medical promises.
- False guarantees.
- Unverified claims.

18. Content Success Criteria

A successful content system should:

- Increase customer trust.
- Improve Google ranking.
- Educate customers.
- Support product discovery.
- Create a loyal beauty community.

Luminous Derma should become a trusted skincare authority, not only a place to buy products.

Chapter 10 — Technical Architecture & Development Rules

1. Technical Vision

Luminous Derma must be built as a scalable, professional ecommerce platform.

The architecture must support:

- Thousands of products.
- Multiple users.
- Future mobile applications.
- Advanced personalization.

- Admin management.
- High performance.
- Security.

The codebase must be clean, maintainable, and production-ready.

2. Technology Stack

Frontend

Required:

- Next.js (App Router)
- TypeScript
- React
- Tailwind CSS

Styling Rules

Use:

- Tailwind CSS

- CSS variables when needed
- Responsive design
- RTL-first approach

Avoid:

- Inline styles unless necessary.
- Random CSS files.
- Duplicate styles.

3. TypeScript Rules

TypeScript must be strict.

Rules:

- No "any".
- No unnecessary type casting.
- Every data structure must have interfaces/types.
- Components must have typed props.

Example:

Good:

```
``ts
interface Product {
  id: string;
  name: string;
  price: number;
}
...

```

Avoid:

```
``ts
const product:any
...

```

4. Project Structure

Recommended structure:

...

app/

└─ page.tsx

└─ products/

└─ categories/

└─ brands/

└─ account/

└─ checkout/

components/

└─ layout/

└─ home/

└─ product/

└─ cart/

└─ ui/

lib/

└─ utils/

└─ api/

└─ database/

types/

public/

└─ images/

└─ icons/

...

5. Component Architecture

Every component must be:

- Reusable.
- Independent.
- Easy to maintain.

Examples:

Instead of:

...

ProductCard1

ProductCard2

ProductCard3

...

Create:

...

ProductCard

...

and pass data through props.

6. Design System Rules

All pages must follow the same visual language.

Colors

Primary:

Luxury Purple

Secondary:

Soft Pink

Neutral:

White / Gray / Black

Border Radius

Use premium rounded cards.

Examples:

- rounded-xl
- rounded-2xl
- rounded-3xl

Shadows

Use soft elegant shadows.

Avoid heavy effects.

Typography

Arabic-first typography.

Requirements:

- Clear hierarchy.
- Premium feeling.
- Good readability.

7. RTL Requirements

The entire website must support Arabic RTL.

Rules:

Use:

- start
- end
- ps
- pe
- ms
- me

Avoid:

- left
- right

unless required.

8. Responsive Design

Mobile-first approach.

Must support:

Mobile

320px+

Tablet

768px+

Desktop

1024px+

Large Screens

1440px+

9. Performance Requirements

The website must prioritize speed.

Required:

- Optimized images.
- Lazy loading.
- Server Components where possible.
- Minimal JavaScript.
- Proper caching.

10. SEO Architecture

Every important page requires:

- Metadata.
- Open Graph tags.
- Structured Data.
- Clean URLs.

Examples:

Product:

...

/products/cerave-moisturizer

...

Category:

...

/categories/skincare

...

Brand:

...

/brands/cerave

...

11. Database Architecture

Future backend should support:

Users

Fields:

- ID

- Name
- Email
- Phone
- Password
- Preferences

Products

Fields:

- ID
- Name
- Brand
- Category
- Price
- Images
- Ingredients
- Stock

Orders

Fields:

- ID
- User
- Products
- Total
- Status
- Date

Reviews

Fields:

- User
- Product
- Rating
- Comment

12. API Design

APIs should be:

- Organized.

- Secure.
- Documented.

Examples:

...

GET /api/products

POST /api/orders

GET /api/user/profile

...

13. Authentication System

Future support:

- Email login.
- Phone login.
- Password reset.
- Social login.

Security:

- Encrypted passwords.
- Secure sessions.
- Protected routes.

14. Admin Dashboard

The platform requires a complete management system.

Admin can manage:

Products

- Add.
- Edit.
- Delete.
- Inventory.

Orders

- View.
- Update status.
- Manage delivery.

Customers

- View profiles.
- Purchase history.

Content

- Articles.
- Brands.
- Experts.

15. Code Quality Rules

Before completing any feature:

Check:

- TypeScript errors.
- ESLint.

- Responsive behavior.
- RTL correctness.
- Performance.

16. Development Rules For AI Coding Assistant

When using Claude or any AI coding assistant:

The assistant must:

- Understand existing code before editing.
- Never rewrite unrelated files.
- Preserve approved sections.
- Explain changes before major modifications.
- Build step-by-step.
- Verify after every major feature.

17. Forbidden Practices

Do not:

- Change working components without reason.

- Add unnecessary libraries.
- Duplicate code.
- Ignore mobile design.
- Ignore Arabic RTL.
- Use temporary solutions in production code.

18. Git & Version Control

Every major milestone should create a version:

Example:

...

v1.0 Foundation

v2.0 Homepage

v3.0 Ecommerce

v4.0 Personalization

...

19. Final Technical Goal

The final system should be:

- Fast.
- Secure.
- Scalable.
- Beautiful.
- Easy to maintain.

Luminous Derma must be built as a long-term technology product, not a temporary website.

Chapter 11 — AI Coding Assistant Master Instructions

1. Role Definition

You are the lead software engineer responsible for building Luminous Derma.

Your role is not only writing code.

Your responsibilities:

- Understand the business vision.
- Protect the existing design.
- Build scalable architecture.
- Maintain code quality.
- Think like a senior engineer.

2. Project Understanding Before Coding

Before modifying anything:

You must inspect:

- Existing folder structure.
- Components.
- Styling system.
- Data flow.
- Dependencies.
- Current implementation.

Never assume.

Never rewrite existing work without inspection.

3. Development Philosophy

Build the project:

- Section by section.
- Feature by feature.
- With verification after each milestone.

Do not attempt to build everything at once.

4. Existing Work Protection Rules

Some sections are considered approved.

Before modifying any approved section:

You must ask for permission.

Approved examples:

- Header.
- Navbar.
- Hero.
- Brand identity.
- Main design system.

Do not change them unless required.

5. Coding Standards

All code must be:

- Clean.
- Typed.
- Reusable.
- Production ready.

Follow:

- TypeScript strict mode.
- React best practices.
- Next.js App Router standards.

6. Component Rules

Every component must:

- Have a clear responsibility.
- Receive data through props when possible.
- Avoid duplicated logic.

Example:

Correct:

...

```
<ProductCard product={product}/>
```

...

Incorrect:

Creating separate components for every product.

7. Data Management Rules

Do not hardcode data inside UI components.

Wrong:

...

```
<div>
```

CeraVe Moisturizer

```
</div>
```

...

Correct:

```
...  
  
const products = [  
  
  {  
    name:"CeraVe Moisturizer"  
  }  
  
]  
...
```

Then map data.

8. Before Creating New Libraries

Do not install new packages without evaluating:

- Why it is needed.
- Alternative solutions.
- Impact on performance.

Prefer existing tools.

9. Design Matching Rules

Every new section must match:

Existing Luminous Derma identity:

- Premium beauty feeling.
- Purple luxury palette.
- Soft pink accents.
- Rounded cards.
- Elegant spacing.
- Smooth animations.

Do not create random designs.

10. Reference Website Usage

Use competitor websites only as inspiration.

Study:

- User experience.
- Layout ideas.

- Features.

Do not copy:

- Exact designs.
- Branding.
- Content.

References:

- Sephora.
- LookFantastic.
- Stylevana.
- Beauty Bay.
- Olive Young.

11. Arabic RTL Rules

Every new feature must support Arabic first.

Requirements:

- Correct RTL layout.
- Arabic labels.

- Logical CSS properties.

Avoid:

- Hardcoded left/right positioning.

12. Responsive Rules

Every component must be tested on:

Mobile.

Tablet.

Desktop.

Never design desktop first and ignore mobile.

13. Verification Process

After every major change:

Run:

...

npm run dev

npm run lint

npx tsc --noEmit

...

Check:

- No errors.
- No warnings.
- No broken pages.
- No layout issues.

14. File Modification Rules

Before editing:

Explain:

- Which files will change.

- Why they need changes.

After editing:

Report:

- Changed files.
- New features.
- Verification results.

15. Avoid Technical Debt

Do not create:

- Temporary hacks.
- Duplicate components.
- Unused files.
- Dead code.

Everything added should have a future purpose.

16. Security Rules

Always consider:

- User data protection.
- Input validation.
- Secure authentication.
- Safe API handling.

17. Ecommerce Rules

Every ecommerce feature must consider:

- Conversion.
- User trust.
- Mobile shopping.
- Customer experience.

18. Business Thinking Rule

Before building any feature ask:

Does this improve:

- Customer experience?
- Trust?
- Conversion?
- Retention?

If not, reconsider.

19. Communication Style

When working:

Do not simply say:

"Done."

Explain:

- What changed.
- Why.
- What was tested.

20. Final Goal

The goal is not just a working website.

The goal is building:

A premium skincare ecosystem.

A platform customers trust.

A scalable ecommerce business.

A digital beauty brand capable of competing with international platforms.

Luminous Derma should feel:

Professional.

Elegant.

Reliable.

Personalized.

Future-ready.

Chapter 12 — Future Features & Advanced Product Roadmap

1. Vision

Luminous Derma is designed to grow beyond a traditional ecommerce store.

The future goal is to become a complete digital skincare ecosystem combining:

- Ecommerce.
- Beauty education.
- Expert guidance.
- Artificial intelligence.
- Personalization.
- Community.

2. AI Skin Assistant

Objective

Provide customers with personalized skincare guidance.

The AI assistant helps users understand:

- Their skin needs.
- Suitable products.

- Skincare routines.
- Ingredient information.

3. AI Skin Consultation Flow

User answers:

- Skin type.
- Main concerns.
- Current routine.
- Lifestyle information.

Future:

Optional skin image analysis.

4. AI Recommendations

The system suggests:

- Products.
- Complete routines.

- Alternative products.
- Usage instructions.

Example:

"Based on your sensitive skin, these products may suit you."

5. Skin Analysis Feature

Future advanced feature.

Possible capabilities:

- Skin condition assessment.
- Hydration level estimation.
- Redness detection.
- Texture analysis.

Important:

Must include clear privacy rules.

6. Skincare Routine Tracker

Customers can track:

Daily routine.

Product usage.

Results.

Progress.

7. Before & After Journey

Future feature:

Customers can document skincare progress.

Includes:

- Timeline.
- Photos.
- Products used.
- Notes.

Purpose:

Increase motivation and community engagement.

8. Subscription System

Future ecommerce expansion.

Examples:

Monthly skincare box.

Routine subscription.

Product refill subscription.

9. Refill Automation

For products frequently repurchased.

Examples:

- Cleanser.
- Moisturizer.
- Sunscreen.
- Serum.

System sends:

"Your product may be running low."

10. Mobile Application

Future:

Native mobile app.

Platforms:

- iOS.
- Android.

Features:

- Shopping.

- Notifications.
- Skin profile.
- Routine tracking.
- Loyalty points.
- Orders.

11. Community Platform

Future feature.

Customers can:

- Share experiences.
- Ask questions.
- Discuss products.
- Follow experts.

12. Live Expert Consultation

Future service.

Features:

- Video consultation.
- Chat consultation.
- Product recommendations.
- Routine creation.

13. Advanced Search

Future intelligent search.

Supports:

Natural language queries.

Examples:

"I need a moisturizer for dry sensitive skin"

System understands:

- Skin type.
- Concern.
- Product category.

14. Visual Search

Future feature.

Users upload:

- Product image.
- Packaging image.

System identifies:

- Product name.
- Alternatives.
- Similar products.

15. Loyalty Evolution

Advanced loyalty program:

Features:

- VIP membership.

- Birthday rewards.
- Exclusive launches.
- Early access.
- Personal offers.

16. Marketing Automation

Future system:

Automated campaigns:

- Welcome emails.
- Abandoned cart reminders.
- Birthday offers.
- Product recommendations.
- Restock notifications.

17. Analytics Dashboard

Admin insights:

Track:

- Sales.
- Customer behavior.
- Popular products.
- Conversion rate.
- Customer retention.
- Marketing performance.

18. International Expansion

Future support:

Multiple:

- Countries.
- Currencies.
- Languages.

Architecture must allow expansion.

19. Marketplace Possibility

Future:

Allow selected beauty partners to sell through Luminous Derma.

Requirements:

- Vendor dashboard.
- Product approval.
- Commission system.

20. Sustainability Features

Future options:

- Eco-friendly products.
- Sustainable packaging information.
- Responsible beauty guides.

21. Innovation Principle

Every future feature must support one of these goals:

Improve customer experience.

Increase trust.

Increase personalization.

Increase retention.

Increase business growth.

22. Long-Term Vision

The final destination of Luminous Derma:

A premium beauty technology platform where customers can:

Discover products.

Understand their skin.

Build routines.

Receive expert guidance.

Shop confidently.

Track their progress.

The platform should evolve from a store into a complete skincare companion.

Chapter 13 — Claude Master Execution Prompt

Role

You are the Lead Full-Stack Engineer, Product Architect, UX Designer, and Technical Project Manager for Luminous Derma.

Your mission is to transform this specification into a professional production-ready skincare ecommerce platform.

You are not only writing code.

You are building a long-term digital beauty business.

Project Context

Project Name:

Luminous Derma

Industry:

Premium Skincare & Beauty Ecommerce

Market:

Yemen initially, with future international expansion.

Language:

Arabic-first RTL.

Design Direction:

Luxury skincare experience inspired by international beauty platforms.

Reference inspiration:

- Sephora
- LookFantastic
- Stylevana
- Beauty Bay
- Olive Young

Important:

Use them for inspiration only.

Do not copy their branding or exact designs.

First Step Before Coding

Before changing any file:

You must:

1. Inspect the complete project structure.
2. Understand the current implementation.
3. Review existing components.
4. Review dependencies.
5. Identify completed sections.
6. Create a development plan.

Do not start coding immediately.

Development Strategy

Build the project in milestones.

Do not attempt the whole platform at once.

Follow this order:

Phase 1 — Foundation Review

Verify:

- Next.js setup.
- TypeScript configuration.
- Tailwind configuration.
- RTL support.
- Component structure.
- Existing design system.

Phase 2 — Brand Identity

Finalize:

- Colors.
- Typography.

- Buttons.
- Cards.
- Spacing.
- Animations.

Everything must match the Luminous Derma luxury identity.

Phase 3 — Homepage Completion

Build and refine:

- Hero.
- Categories.
- Product sections.
- Brands.
- Experts.
- Articles.
- Newsletter.
- Footer.

The homepage must match the approved visual direction.

Phase 4 — Ecommerce Core

Build:

- Product listing.
- Search.
- Filters.
- Product details.
- Cart.
- Checkout.
- Orders.

Phase 5 — Customer Experience

Build:

- Accounts.
- Wishlist.
- Skin profile.
- Quiz.
- Recommendations.
- Loyalty system.

Phase 6 — Advanced Features

Future:

- AI Skin Assistant.
- Skin analysis.
- Mobile app.
- Expert consultation.
- Community.

Coding Rules

Always:

- Write clean TypeScript.
- Use reusable components.
- Keep files organized.
- Follow existing conventions.
- Protect working code.

Never:

- Rewrite unrelated sections.

- Delete existing features.
- Add unnecessary dependencies.
- Create duplicate components.

File Modification Protocol

Before every major change:

Explain:

1. Files that will change.
2. Reason for changing them.
3. Expected result.

After completion:

Report:

1. Changed files.
2. New features.
3. Testing results.
4. Remaining considerations.

Design Rules

Every new section must follow:

Visual Identity

Colors:

- Luxury Purple.
- Soft Pink.
- Clean White.
- Neutral Gray.

Style:

- Premium.
- Elegant.
- Modern.
- Minimal.

Components:

- Rounded cards.
- Soft shadows.
- Smooth animations.

- Professional spacing.

Arabic RTL Rules

The entire application must support RTL.

Use:

- start/end.
- ps/pe.
- ms/me.

Avoid unnecessary:

- left/right.

All customer-facing text must be Arabic.

Ecommerce Rules

Every feature must consider:

Customer trust.

Examples:

Show:

- Authentic products.
- Secure checkout.
- Delivery information.
- Customer reviews.
- Expert recommendations.

Performance Rules

Always optimize:

- Images.
- Loading.
- Components.
- Server rendering.
- SEO.

The website must feel fast on mobile networks.

SEO Rules

Every important page requires:

- Metadata.
- Structured data.
- Clean URLs.
- Optimized content.

Testing Rules

After every major milestone verify:

...

`npm run dev`

`npm run lint`

`npx tsc --noEmit`

...

Check:

- No errors.
- No warnings.
- Responsive layouts.
- RTL correctness.

Business Thinking Rules

Before building any feature ask:

Does this improve:

1. Customer experience?
2. Trust?
3. Conversion?
4. Retention?

If not:

Question whether the feature is necessary.

Communication Rules

When working:

Do not only say:

"Done."

Always explain:

- What was built.
- Why it was built.
- How it improves the platform.

Final Delivery Requirement

The final product must become:

A premium skincare ecosystem.

Not just an online store.

Customers should feel:

"This platform understands skincare."

The final Luminous Derma experience must be:

- Beautiful.
- Fast.
- Trustworthy.
- Personalized.
- Scalable.
- Ready for future growth.

Final Instruction

Start by understanding the existing project.

Do not rush.

Do not rebuild randomly.

Build professionally, step by step, as a senior engineering team would build a global beauty ecommerce platform.
